DFF Newsletter

Editorial

By Dr. Susanne Bieller, DFF

Dear Reader,

As the recent DFF meeting on September 10, 2009 at BMW in Munich was targeting “Displays for Automotive Grade Applications and Display Interfacing”, we decided to also dedicate this newsletter to automotive topics. In 2007, the DFF started an activity called “Automotive Platform”, which developed vibrant activity since then. One year ago, two working groups were formed, so this is the right time to summarise to you their goals and activities and their current status of progress.

Furthermore, the newsletter summarises the recent DFF Working group meeting and the General Assembly, held one day before the WGM at the BMW premises. The General Assembly included elections to the Board. Two new members were elected to the Board, Otto Bader from AEG MIS and

Hartmus Heske from Sharp Microelectronics Europe. Peter Bullen (now DisplayNet GmbH) did not longer candidate for the Board. Dr. Jörg Winkler, Plansee Metall GmbH, was elected Chairman FPD Technologies, together with

Robert Isele, BMW AG, who was confirmed in office as Chairman FPD Applications.

Last but not least, this newsletter of course reports on current and upcoming DFF activities and events and gives you an overview on the news in the display community — in Europe and abroad.

Enjoy reading!

Short Content

- Editorial
- Automotive Platform – Targets and Status
- News from DFF
- News from DFF members
- Other News
- Events calendar

DFF would like to thank all members and guests for contributing to this newsletter. Guest contributions do not necessarily reflect the opinion of DFF.
